

MISINFORMATION

“False information that is spread, regardless of whether there is intent to mislead.”

① DO YOU KNOW EXAMPLES OF MISINFORMATION?

② HOW IT AFFECTED YOUR LIFE?

WHAT DO YOU THINK IS THE MOST

③ COMMON PLACE TO SPREAD MISINFORMATION?

Thought I'd spread abit of positivity for you guys. Since the lockdown of Venice without the pollution from boats the water has been begun to clear up and a dolphin has been spotted in the canal for the first time in nearly 60 years! [#venice](#)

Venice hasn't seen clear canal water in a very long time. Dolphins showing up too. Nature just hit the reset button on us

Fake animal news abounds on social media as coronavirus upends life

Bogus stories of wild animals flourishing in quarantined cities gives false hope—and viral fame.

PUBLISHED MARCH 20, 2020 • 8 MIN READ

Scattered amid a relentless barrage of news about COVID-19 case surges, quarantine orders, and medical supply shortages on Twitter this week, some happy stories softened the blows: Swans had returned to deserted Venetian canals. Dolphins too. And a group of elephants had sauntered through a village in Yunnan, China, gotten drunk off corn wine, and passed out in a tea garden.

These reports of wildlife triumphs in countries hard-hit by the novel coronavirus got hundreds of thousands of retweets. They went viral on Instagram and Tik Tok. They made news headlines. If there's a silver lining of the pandemic, people said, this was it—animals were bouncing back, running free in a humanless world.

But it wasn't real.
