Moreover, it is not even known whether they have been vaccinated against Covid19.

Prosecutors are investigating after a 31-year-old man allegedly placed powerful explosives

The suspect had reportedly taken a device out of a backpack and placed it on the pavement on Monday.

The incident occurred near the Polish presidential palace and Warsaw's Old Town tourist area.

More than 300 people were taking part in a commemorative march for victims of a World War II massacre when police detained the man and evacuated the area. A police bomb squad then removed the device.

Authorities were waiting for expert opinion on the type and potential range of the explosive device, according to Aleksandra Skrzyniarz, a spokesperson for the city's prosecutors' office.
